FALL CHAUTAUQUA PROGRAM ENJOYED

Chautauqua closed on Wednesday night and everyone appeared to be well pleased with the program furnished by the different artists. The local committee have a surplus of \$62.00 after paying the guarantee and local expenses. A new contract is being signed up for a summer Chautauqua next season.

Notice

A meeting of the members and patrons of the Northern Alberta Dairy Pool, Ltd., will be held at Irma on Saturday afternoon, December 15th at 2 P. M. and a similar meeting will be held in Wainwright Friday afternoon December 14th. Mr. J. R. Love, Secretary, will be at both meetings.

New Bakery.

Mr. R. H. Stone of Edgerton arrived in Irma Wednesday evening to start a new bakery. Mr. Stone has rented the building formerly occupied by Dr. Haworth, and is remodeling the same and putting in a new bake oven. He expects to be ready to open as soon as possible and no doubt will enjoy a good business in his new location.

Arm Hurt.

Mr. Roy Molton is carrying his right arm in a sling the result of an accident when he was driving a team hitched to a stone boat. One of the runners caught on a root throwing Roy when he landed on his shoulder or breaking one of the bones.

Mr. A. H. Locke lost a valuable silver fox on Thanksgiving day, anyone able to return same will be suitably rewarded.

LEGISLATURE TO MEET JANUARY 24th

The Alberta Legislature will be called to meet for the forthcoming session on January 24th, 1929, it is announced by Premier Brownlee. Opening of the House at this date is subject to any unforeseen developments in connection with the sale of the government railroads and other questions which will be included in the program of legislation for the session.

KING GEORGE RALLIES

Report received over the radio today at noon stated that the King passed a comfortable night and there was some improvement in his condition which has been considered grave by his medical advisers.

Mrs. T. Knowles was taken to Edmonton Tuesday night for special medical treatment. Mr. Knowles returned Thursday and reported Mrs. Knowles was resting nicely but the doctors had not diagnosed the case yet.

CHURCH NOTICES AND ACTIVITIES

CHURCH NOTICES

The subject of Mr. Wright's address at the United Church next Sunday evening will be "The Principles of the Spiritual Harvest."

Services

Irma — Church School at 11 A.M. Preaching Service — 7.30 P.M. Alma Mater — Preaching — 2 P.M. Sunday School — 3 P.M. Roseberry — Sunday School 2.30 p.m. Preaching — 3.30 P.M.

This will probably be the last service at Roseberry for this season. Contributors to the support of the United Church are reminded that the books close Dec. 31st.

Those wishing their contributions credited this year should pay to the Stewards before Dec. 25th.

The Church School at Irma is putting on a Christmas Pageant entitled "The Xmas Story." Dale later. Frank Maguire and Ray Locke are the winners of the prizes for reading "The Yarns of Different Countries" Missionary stories.

ALBERT ITEMS

Last Friday night Mr. L. H. Hardy gave a wedding dance at the Albert schoolhouse. A large crowd gathered and dancing was held until the wee small hours. A tasty supper was provided and lots of it for the large crowd. The centre of attraction being the Bride's Cake, a three tier cake, beautifully decorated. The bride received many useful presents.

After the supper speech had been ably given by Mr. L. H. Hardy, dancing was continued until morning. Messrs. A. Larson and Walter H. Larson rendered excellent music for the dance. We all join in wishing Mr. and Mrs. L. H. Hardy long life and happiness.

We understand Wm. Ramsay has received some foxes from the East. Good luck! Bill.

NEWS ITEMS FROM KINSELLA

Miss L. Torgersen spent the weekend at her home in Edmonton.

Mr. and Mrs. E. C. Williams and daughter Dorothy spent a day in Edmonton last week.

Mr. D. Corbett was in Edmonton last week.

Mr. William Anderson who had been in Edmonton for about 10 days returned home Wednesday.

Mrs. Batchelor and family who spent a week with Mrs. Anderson returned to her home at Fabyan on Thursday.

Mr. Third who recently bought out Mr. P. J. Wangness store here was called to Edmonton last week on account of the serious illness of his wife. The last report stated that she was very low and not expected to live.

The Ladies Aid held their Bazaar in the Church on Saturday afternoon December 2nd although the day was not very pleasant, there was a very good crowd and things were soon picked up. They took in \$130.00.

The annual meeting of the Ladies Aid will be held with Mrs. William Anderson on December 13th.

Don't forget the Christmas entertainment on December 20th.

Mr. and Mrs. Lund of Viking have been spending a few days with their daughter Mrs. Carl Smogard.

Mr. Carl Soniff spent a couple of days with his family at Irma returning Wednesday to Winters, Sask., where he is foreman of an extra gang which is laying new rails on the main line of the C. N. R.

Modern Aladdin's Lamps

The average man and woman realizes that the world is making progress at an ever accelerated pace; that in the space of a few brief years greater improvements and more wonderful inventions are made to add to the comfort and pleasure of life than were recorded in many centuries of the past. There was a time when people received news of any great innovation with extreme skepticism, and ridiculed the idea of such things being possible. Today, the world is prepared to accept almost anything as possible.

However, it is the occurrence of some anniversary which actually forces upon us a realization of just how great and how rapid is the progress being made by the human race. Such an anniversary came last October when recognition was paid to Thomas A. Edison, in commemoration of the golden jubilee of what is generally accepted as being the greatest of his many great inventions, the incandescent electric lamp.

The tale of Aladdin and his wonderful lamp has delighted readers, youthful and adult, for many generations, but the accomplishments of man in the world of electricity following Edison's invention of his marvelous lamp, and the series of amazing inventions since then, and all more or less directly connected with Edison's discovery, in many respects surpass the most vivid imaginings of the Arabian Nights tale.

In this age of electricity, with our streets, homes and places of business lighted by the invisible current, our machinery operated by it, our homes heated by it, with every conceivable household device dependent upon it, with it as the agent to flash our news and messages around the world, and because of which we are enabled to talk under the oceans and through the air, it becomes well-nigh impossible to imagine a world lighted by the old kerosene lamp and tallow candle. Yet it is only fifty years since the world so labored in comparative darkness.

Had Edison, the wizard of Menlo Park, not succeeded in his effort to produce the incandescent lamp, would the world today enjoy all the pleasure and profit of the radio, which depends upon the use of the vacuum tube? Would the health giving rays of the quartz lamp be conferring benefits upon stricken humanity? No. To Thomas A. Edison the world is forever debtor for his great contribution to humanity's welfare and the world's wealth.

Fifty years! Not equal to the average span of a man's life. Yet Edison within that space of time has given us not only the incandescent lamp and all that has followed that initial invention, but to him belongs the credit of capturing the human voice upon a cylinder of wax, thus giving us the gramophone. It is thanks to Edison that we are able to produce pictures in which people move as they do in actual life, an invention that is profoundly affecting the life and thought of the world. And now we have the talking movies, the result of a combination of two of Edison's original inventions.

Within an even shorter space of time the automobile has not only been brought to its present state of efficiency and power, but it has been adopted all over the world, completely revolutionizing our manner of living and our mode of travel, and enormously broadening our knowledge of the world in which we live. Within the short space of a decade we have witnessed the airplane take its place as an accepted instrument in our modern life, and even on these Western prairies it is now a daily commonplace to witness these new messengers winging their speedy way from city to city carrying passengers, mail and express.

Science and invention is thus conferring upon this generation new wonders and new facilities of power, greater opportunities for pleasure and profit, or, ill-used, greater possibilities for catastrophe. With all the powers now being placed so rapidly under his control, man must continue to mount higher in intelligence and in all those moral attributes which alone will make him fully capable of rightly using the great possessions entrusted to him, and the number and variety of which increases almost hourly. For it must be remembered that in the final analysis the use or abuse, the deriving of good or the suffering of evil, arising out of these wonderful scientific achievements, depends upon man himself and the attitude he takes towards life and all its realities and possibilities.

Woolen Mill For B.C.

British interests have recently established a plant for the manufacture of worsteds at Victoria, British Columbia. This plant has 6,400 spindles and promises to prove an important industry for the capital of British Columbia.

Milk For Dairy Factories

The approximate amount of milk required to supply dairy factories in Canada during 1926, based on the quantity of milk delivered and the equivalent in milk of the butter fat content of the cream delivered, was 7,118,940,782 pounds.

In England 2,500 automobiles are being delivered to new owners every week.

Several coal mines in Ireland are being abandoned.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless, dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

In Memory Of Colonel McCrae

Oak Tree From Georgia Planted On McGill College Campus

During Armistice Day a two-year old oak tree was planted on the McGill campus, at Montreal, in memory of Col. John McCrae, author of "In Flanders Fields." The tree was sent by the State Teachers College, of the University of Georgia, on whose campus a similar planting took place at the same hour. It is noteworthy that the best known and most beautiful poem, inspired by the Great War, should have been written by a Canadian, and the action of the Georgia College is also a friendly gesture which will be much appreciated on this side of the border.

RHEUMATIC VICTIMS

Can Find Relief Through Building Up the Blood

Pain is the symptom of rheumatism that every victim recognizes, and he generally attributes the trouble to cold, damp or changeable weather. But doctors know that thin blood is a marked characteristic of the trouble. Trying to cure rheumatism while the blood remains thin and poor, is an impossible task because there is nothing to build upon. A tonic like Dr. Williams' Pink Pills that enriches the blood and frees it from poisonous impurities soon banishes rheumatism from the system. So long as the blood is maintained in a healthy condition the trouble will not return. This is not theory. It has been proved in hundreds of cases, here is one—Mr. J. W. Rose, R.R. 2, Albany, P.E.I., says: "For some years I was a great sufferer from rheumatism and although I tried a great many remedies, I did not get any permanent relief until after I took Dr. Williams' Pink Pills. The trouble was located mostly in my shoulders, and at times was so bad that my right arm was almost useless. Of course I suffered much pain and great inconvenience. My attention was directed to Dr. Williams' Pink Pills through an advertisement in our newspaper, and I decided to try them. I took the pills according to directions with the result that the rheumatism has left me, and I have never had a twinge of it since. If I have need the cure of rheumatism sufferer my advice is to try Dr. Williams' Pink Pills at once."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Our Great Agricultural Wealth

Canada the Best Country in the World For Farming

"I can say without any hesitation, that Canada is the best country in the world for farming at the present time. It has greater possibilities, and there are indications that there is greater stability and prosperity than can be found in any other country," said Dr. E. S. Archibald, director in charge of the Dominion Experimental Farm at Ottawa, addressing the Young Men's Canadian Club at Montreal. Dr. Archibald said that the crops in Canada are worth \$1,157,000,000, which alone was equal to the fisheries and forests all put together; dairy produce reached \$300,000,000 which was equal to the total of the fisheries and mines; wheat exports \$422,000,000, or a third of the country's total exports and that there were over 225,000,000 acres capable of producing, but not occupied. He estimated the Dominion's agricultural wealth at \$7,520,000,000, and that at least \$3,500,000,000 of capital was invested in agriculture.

Aerial Photography

Work of Government Fliers Practically Completed For This Season

Aerial photography for map making purposes by Government fliers has been practically completed for the year according to Wing Commander J. L. Gordon, R.C.A.F. Eight detachments of two planes each have been operating throughout the Dominion for several months. Three machines operating at St. Donat, Quebec, have already returned to Ottawa, while the remainder are expected within the next few weeks. Aerial surveys have been made throughout the Maritimes, in Northern Ontario and as far north as Fort Smith in the Northwest Territories. Preliminary maps of the various localities covered will be completed with data gathered this year.

Gypsum Products

Probably the most important developments in the gypsum industry in Canada have taken place in the products manufactured from gypsum. A number of years ago a small proportion of the gypsum mined in Canada was exported to this country. In 1927 approximately 192,000 tons were calcined and made into wall plaster, gypsum wall board, gypsum blocks, and insulating material.

More than 1,000,000 bags of coffee will be raised in Venezuela this year.

Effect Of Sunlight

On Dairy Products

Particularly Detrimental On Milk, Cream and Butter, Says Authority

Dr. E. G. Good, Chief of the Division of Dairy Research, of the Federal Department of Agriculture states that it is a well established scientific fact that direct sunlight has a detrimental effect on the flavor of practically all dairy products, and especially on milk, cream and butter.

This statement was given by Dr. Good, when questioned regarding the practice of housewives using window-sills as refrigerators during the autumn season when they have stopped taking ice. From the standpoint of keeping the products cool, the window-sill answers the purpose, but if the window is located where direct sunlight can reach it, dairy products should never be kept there.

Milk, cream and butter when exposed to direct sunlight quickly develop abnormal flavors which are generally of a metallic or tallowy nature. This tallowy flavor is caused by the action of sunlight on butterfat and has been known to develop to a very noticeable degree after an hour or so. In the case of butter, the fat turns to a very light or white color, and the same change takes place in the fat in milk or cream whether it is homogenized or not.

Dr. Good states that if consumers find that milk or cream has become tallowy in flavor after keeping it for twenty-four hours, they should not blame the dairy by whom they are supplied, if these dairy products have been kept in a window exposed to sun. This flavor can be prevented if milk and cream is protected from direct sunlight by wrapping the bottles in a piece of heavy brown paper or by placing them in a wooden box made for the purpose, outside it is necessary to keep them open. But a cool shaded corner in the cold storage of the cellar is always a safe place to keep dairy products at this time of the year, when outside temperatures are generally lower than those obtained in the average household refrigerator.

Recipes For This Week

(By Betty Barclay)

WILD WEST RELISH

3 dozen sweet cucumber pickles, sliced.
1 pound puffed raisins.
1 teaspoon whole allspice.
1/2 ounce stick cinnamon.
2 cups brown sugar.
1/2 ounce celery seed.
Vinegar to cover.

Place all ingredients, except celery seed, in a porcelain lined kettle, cover with vinegar and cook one-half hour over a moderate flame. When cold remove cinnamon, add celery seed, put in sterilized jars and seal. This relish is always a safe place to keep dairy products at this time of the year, when outside temperatures are generally lower than those obtained in the average household refrigerator.

RED BEANS AND RICE

(A Famous Creole Combination)
1 pound of red beans.
1 teaspoon salt.
1 teaspoon butter.
1 small onion, minced.
1/2 red pepper.
Boiled rice.
Soak the beans over night, or for at least six hours. Then simmer for four hours or more in 2 full quarts of water. The beans will then be quite soft. Add the salt, butter, onion, red pepper, and continue the simmering process for two hours longer. Serve with boiled rice, and the combination is not only good but particularly well balanced. A pound of salt meat, scalded, is often substituted for the above seasoning, excluding the onion. The minced onion entirely disappears in the simmering and makes a delicious seasoning.

Need Standard Grain Crop

Hon. W. R. Motherwell, Minister of Agriculture, addressing the Canadian Club of Fort William, stressed the need of western farmers raising the standard of grain which they produce, and reducing the varieties of wheat from 30 or 40 now grown to three or four kinds, which should be regarded as standard and be the only kinds admitted to No. 1 grade.

South Africa Buying Certified Seed Potatoes

Year Gave Good Results

Trade with South Africa in certified seed potatoes from Canada is being promoted—another tribute to the excellence of our spuds.

Last spring small quantities of Irish Cobber, Green Mountain and Dooley varieties were shipped to South Africa from Eastern Canada. They arrived in Capetown in excellent condition and gave good results there.

The South African growers preferred Dooley as more suitable to their special requirements. This season they are testing, at their own request, other varieties—small sized seed, of two to three ounces, from certified crops.

The British Columbia Inspector is obtaining for this purpose quantities of two to three ounce seed of the following varieties:—Up-to-date, Sir Walter Raleigh, Burbank and Epure. As there was no crop of certified Epicure in British Columbia this season Wisconsin Pride and Bliss Triumph were substituted for that variety. Results in South Africa from this British Columbia certified seed will be closely watched and may lead to the development of a worthwhile trade.

Long Standing Asthma. Many have suffered so long from asthma and have tried so many so-called remedies that there is no real help for them. They should read the letters received by the manufacturers of Dr. J. D. Kellogg's Asthma Remedy from hundreds of cases once as desperate as their own. Even in long-neglected cases this famous preparation brings prompt help.

Model Town For Alberta

New One To Be Laid Out Near Lethbridge

The first new model town in Alberta that Horace Seymour, the provincial town planning expert, will have to lay out will be Wallace, near Lethbridge. His advice in a plan for the town has already been requisitioned.

Wallace is a brand new town that is to be built in connection with a coal mining development in the Lethbridge northern irrigation district. Premier Brownlee is advised that the Mortimer Davis coal interests of Montreal have begun a large development there, with plans so far advanced that definite steps are about to be taken for laying out and building a town. Mr. Seymour will take up the case as soon as possible.

Canadian Gold Production

If gold production in the United States continues to decline in the fairly steady way it has done since 1915, Canada with its yearly increasing production will in a very few years be the second largest gold producing country in the world.

"How is it that gas kills so many people every year?"
"Because they step on it."

All-Red Air Route

Important Developments In Inter-Empire Communications Expected Soon

An all-red air route around the world is seen as a strong possibility in the near future by J. A. Wilson, controller of civil aviation, who recently returned from a sojourn of two months in the British Isles and Europe. "Enormous developments in Inter-Empire communication may be expected within the next few years," Mr. Wilson said. "While efforts so far have been to some extent concentrated on flights to India and Africa, the eyes of British flyers are turning towards Canada." The R-100 and R-101 will shortly be ready for their trial trips, and in the early spring would be ready for trans-Atlantic trips to Montreal. Mr. Wilson viewed both of the enormous dirigibles and discussed the contemplated flights with air officials in England.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

Hemp Growing In Manitoba

Hemp growing is gradually assuming promising proportions in Western Canada. Double the acreage of 1927 has been devoted to hemp growing at Fortage in Prairie, and the yield is very good. The Manitoba Cordage Company Limited reports an increasing demand for its products.

Minard's Liniment For Chapped Hands.

Trees Used In Making Paper

Spruce, balsam, hemlock, and poplar together made up over 97 per cent. of the total wood used by the pulp and paper industry in Canada in 1925.

ASPIRIN

To break a cold harmlessly and in a hurry try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it will relieve pain Aspirin means Bayer manufacture, to ensure the public against imitations. The Tablets will be stamped with their "Bayer Cross" trademark.

Some Side Lights On The Immigration Question As Given By Hon. Chas. Dunning

The following is an extract from a speech delivered by Hon. Chas. Dunning to the Canada Club in London:

"If you ask me what the result of the harvest experience from Great Britain will be, I say that it will be exactly the same kind of result that has followed the harvest experience from Eastern Canada. A great many of the men—I do not know how many, maybe half, maybe less than half—will remain. A very considerable proportion of the balance, judging from my experience, will return. After all, the migration theorists—and their name is legion—base their theories on the idea of a man finding it easy to get to Canada and hard to get back. From the point of view of one who went there without any means of getting back, and when there was no paternal government to help him in getting back, I can assure you that there comes in the life of every immigrant a period of homesickness, a period of heartbreak. Many say, 'The only reason why we did not get out was because we had to walk and it was too far,' and too much paternalism just at that time is not a good thing.

Now turn it around. Knowing the Englishman, and being one, I say that if you try to persuade an Englishman to do something he is generally suspicious of you. I am not at all sure that it will not be found that the best way to get British immigration is to say to the Britisher, 'Come and look us over; we do not care much whether you stay or not individually. If you like us and like our country, you are welcome; if you don't like us and don't like our country, for Heaven's sake, go back home.' I am convinced—and it is the basis of the harvest experience—that that will constitute a greater appeal to the Britisher than trying to convey to him that there is an Eldorado there, and that he has only to come over and scoop it up. Most of them won't believe such a thing, and those who are foolish enough to believe it are going to be the worst advertisement that Canada can possibly get.

I am often asked this question, 'What about taking people out there and settling them on farms of their own?' Is not that the best way to develop a great agricultural community in Canada? My personal experience, like the experience of thousands of others from this country tends to make me doubtful of any large measure of success attending schemes which have for their object the starting of people on farms of their own in Canada immediately they go out, without their having previous Western Canadian farming experience. Such schemes are well conceived, but they are based upon that old fallacy of the city dweller that anybody can farm. In these days the business of agriculture is a highly scientific and highly commercial business; it requires experience. If you doubt that, ask anyone; ask the prime minister—who is trying it—what his experience has been; ask any one of the thousands of business men, bankers, and lawyers in Canada who own farms and who try to make money running them. If it is an easy business, and even a lawyer will tell you that law is a great deal more remunerative.

Diatomite In British Columbia

The largest deposit of diatomite in the Dominion at present known, is in the vicinity of Quesnel in central British Columbia, where material of pure grade occurs in beds 40 feet thick that extend over a large area.

Tourist—"How far to Pleasantville?"
Native—"13,650 billboards."

Thousands in the rural districts of Cuba are out of work.

Landlady: "Why have you put your coffee on that chair?"
Lodger: "It is so weak that I thought it needed a rest."—Sondags-Tidning, Stockholm.

Chinese Ban Effective

Entry Into Canada Made Almost Impossible Says Official

"Unless some of the ingenious devices of those attempting to smuggle Chinese into Canada have been successful, not a single individual from China has entered the Dominion since 1923, exclusive of those returning to Canadian domiciles established previous to that year," declared W. C. Cowell, investigating inspector of immigration for the Pacific region under the Dominion government, who was in Montreal recently on his way to Vancouver after visiting his former home on the Isle of Man.

Mr. Cowell was reluctant to discuss immigration policies but offered some information. Prior to 1923, he said, there was a law prohibiting Chinese women from coming to Canada. This did much to limit the growth of the Chinese population here, because the Chinese are notably polygamous.

Of the old 100,000 Chinese in Canada now, 60,000 contribute towards Vancouver's population of 500,000, he said, and of all these Orientals complete records are kept, including photographs. But those born here are legally Canadians and are unregistered, except for purposes of facilitating their return from visits to China.

303

New Elegance

A simple dress of printed sheer velvet for the youthfully smart woman in combination with georgette crepe, with swathed giraffe and flaring godet caught at waistline with ornament of brilliants. The shoulder bow with long loose end at back adds individual smartness. Experience isn't at all necessary to make it, for it is merely a two-piece skirt, attached to two-piece waist with tucks at each shoulder at front. The godet, a separate piece of material shaped to give dipping flared effect, is shirred at top and stitched to dress. It is irresistible in new shade of red dull silk crepe, prune shade sheer velvet, black crepe satin, claret-red canton flannel crepe or navy blue wool crepe. Style No. 303 can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. For the 36-inch size, 2 1/2 yards of 40-inch material with 1 1/2 yards of 40-inch contrasting is sufficient to make it as pictured, or 3 1/2 yards of one material. Pattern price 25 cents, in stamps or coin (coin is preferred).

New Estimate Canada's Crops

Revised Figures Give Details Of Largest Crop Canada Has Yet Produced

Canada's wheat crop in 1928 of 500,613,000 bushels as given in a revised estimate just issued by the Canadian Government Bureau of Statistics is the largest crop the Dominion has produced. It is 60,888,396 bushels more than in 1927, and 26,414,000 bushels more than the previous record crop of 1923, and over 440,000,000 bushels higher than the total yield in 1900.

This year's total of 500,613,000 bushels was produced from 24,114,846 acres representing an average yield of 20.8 bushels per acre. The 1927 crop totalled 440,024,700 bushels from 22,660,154 acres, an average yield of 19.5 bushels to the acre.

Except for slightly over 21,000,000 bushels Canada's wheat crop is grown in the three prairie provinces—Manitoba, Saskatchewan and Alberta. These three provinces yielded a total of 479,598,000 bushels, of which Saskatchewan accounted for 278,575,000 bushels, Alberta, 144,655,000, and Manitoba, 53,457,000.

The oat crop is estimated at 437,505,000 bushels; about 2,200,000 bushels less than in 1927. This year's yield of oats averaged 33.3 bushels per acre. The 1928 barley production, totalling 134,352,000, is the highest on record. It is 37,515,000 bushels higher than in 1927. The average yield of oats this year was 27.6 bushels. Rye gave an aggregate yield in 1928 of 14,625,800 bushels or 324,800 below the 1927 total. The yield per acre averaged 17.4 bushels.

Livestock Train Travels Over Canadian National

Sheep and Swine Problems Will Be Discussed

Thirty-two rural districts in Saskatchewan will be visited by the special live stock train which is touring the east, central and the north-eastern parts of the province under the auspices of provincial Department of Agriculture, and the Department of Colonization and Agriculture of the Canadian National Railways. The train consists of ten cars, of which one is used for staff quarters, and one for lectures. These cars are equipped and carried free of charge by the Canadian National Railways, and are directed by the Provincial Department of Agriculture in co-operation with the Dominion Live Stock Branch, the Live Stock Exchange, the Industrial and Development Council of the Canadian Meat Packers and the Saskatchewan Sheep and Swine Breeders' Association. J. G. Robertson, Live Stock Commissioner for Saskatchewan, is in charge of the train.

The lectures deal with the breeding and feeding of sheep and swine, and farmers are invited to discuss their problems in raising livestock. A special feature is the showing of educational motion pictures.

The train left Regina on November 14th, for Balcarres, the first stop. The last exhibit takes place at Bethune on December 20th.

Aid Sheep Industry

Quebec Farmers Receive High Grade

Seven hundred choice ewe lambs have been selected by the Federal and Provincial Departments of Agriculture and sold to the farmers in the Province of Quebec this fall. The lambs are the offspring of improved sires and have been distributed at the rate of 1,000 to 1,500 a year for several seasons for the improvement of stock. The cost to the farmer is from \$10 to \$11 a head.

Perhaps what is lacking in solving the traffic problem these days is horse sense.

Victoria, Australia, plans to spend \$5,000,000 in building houses.

FAMOUS PROSPECTOR

John Jones, the famous prospector, who plans to go to Fix Inlet, Baffin Land, next winter. He is seeking the biggest silver, zinc and lead proposition in the Hudson Bay area, and bases his hope of finding it on information received from Major Burwash, chief government geologist. Johnny says that there will be about eight men in the party as well as a supply of husky dogs and his Arctic sleigh, a specially constructed machine capable of about 60 miles an hour. Asked what he saw looked the best to him in the north now, Jones said: "Porcupine; it hasn't any equal. There are some more Hollingers on the way; and, by the way, Hollinger isn't by any means done."

Signs Of Prosperity

Amount Of Railroad Traffic An Indicator Of Prosperous Times

"The real sign of prosperity in the Canadian West at this time of the year is the amount of local rail traffic," said C. E. McPherson, head of the passenger department of the Canadian Pacific western lines, on his return from a trip through the Prairie Provinces. "The business being done through our smaller towns this year to commercial centres is very large, and by that fact can be judged the prosperity of the Western farmer who this year has threshed a large crop of good quality and has realized on part of it at least." Mr. McPherson said that travel from the Prairie Provinces to the east and the West this Christmas would be heavy, and that the Canadian Pacific would run a greater number of specials from Saint John than ever before.

First Crop Paid For Land

Instances Quoted Where First Returns Covered Cost Of Purchase

Instances of the payment for farm land from the proceeds of the first wheat crops planted upon it are recorded in the Lethbridge Herald in respect to farms in Milk River Valley. S. I. Harris bought a quarter section at \$15 per acre without interest; raised 10,000 bushels, which in parts yielded 60 bushels to the acre and more than paid for the land. In this same district Mr. Loft and N. Pederson had previously purchased a half section at \$23 per acre. Half of last year's crop paid for the land in full; and this year they threshed a crop of 36 bushels per acre of stubble land in wheat, and now they have just closed a deal for one and a half sections of land adjoining the former holdings.

Alberta Cattle Topped Market

Hill and Bates, Lethbridge, Alta. live stock dealers, have been advised by Walters and Dunbar, of Chicago, that the 93 head of dry cows from the McEntyre ranch had sold readily at Chicago, and had topped the market for that day for fat cows at 12 1/2 cents. Shippers are pleased with this showing, as it speaks well for Canadian cattle sold immediately on their arrival after a long rail haul.

Many Letters are Evidence of Appreciation of Canadian Hospitality by American Tourists

The end of the busiest tourist season which Canada has ever experienced has brought many letters of appreciation of Canadian courtesy and hospitality, says the Department of the Interior through its Natural Resources Intelligence Service. This Service, which is in close contact with the tourist traffic and has handled many thousands of enquiries for information on Canada, is happy to broadcast the news that practically no complaints have been received this season of unfair treatment of the tourists.

A year ago it was felt that it was necessary to issue a warning, "Don't Overcharge the Tourist" ran the message which was sent out by radio and through the press. That this slogan has been adopted by Canadian business people, and the thousands of persons who cater and look after the welfare of the visitors, seems certain from the tenor of the correspondence so far received. It is surprising how many of the persons who received maps, or tourist literature, or descriptions of canoe routes, send in friendly notes of appreciation after the conclusion of their trips. The secretary of a golf club in Pennsylvania, wrote recently:

"I have just returned from a very delightful tour of Canada and was very much impressed with the beauty of the place, the good roads, the courteous treatment of the people and the very moderate prices charged the tourists."

A member of a fishing party that had visited the Rainy Lake District, wrote:

"We were particularly impressed by the reception we received from everyone on that side from the officials all the way down the line to the native Indians. Everyone was friendly, cordial and very willing to help us in any way, shape or manner that they could."

Among the correspondents are many who have visited Canada in each successive season over periods of 5 to 10 years. It is particularly gratifying to read from a Cleveland business man's letter as follows:—

"I merely want to express my appreciation of the very fine way you take care of tourists in the Dominion. It may be of interest to you to know that I have spent the greater portion of my vacation for the past nine summers in Canada, and I have always found not only the private citizen, but holders of public office, courteous and ever willing to be of assistance."

"In view of this it is hardly necessary to say that I have been delighted with the kind of treatment I received, with the people I have met, and also that in my opinion, there isn't any other place to spend a vacation."

Everyone has come in contact with the system still or less in vogue, of chain selling of merchandise, especially silk hosiery and gadgets for the car, etc. Our American friends are chain selling Canada's scenery and getting real pleasure out of bringing their friends to the Dominion. The president of an athletic club in Indiana writing about his annual vacation in Ontario, says:—

"From a small start of one member making this trip five years ago, this year we had more than thirty who went up in several parties. There will be more next year, at least forty."

It is surprising the proportion of the tourists who wish to get away back in the wild on fishing and canoeing trips. The department has had requests for information on canoe routes in all the provinces and territories from the Maritimes to the Yukon. Others not so ambitious as to undertake a canoe trip of two or three hundred, or a thousand miles want to know where to locate a lodge or some quiet restful lake where the fishing is good. The full effect of the chain selling of news on Canada is to be seen from the experience of the member of a fishing party, who having had a wonderful and successful trip into the Laurentians, wrote a brief item which was published in the Sunday edition of a large city daily. "Within seven days" time runs the account of this experience "the owner of the lodge where we camped had received seven inquiries by mail, and our Mr.—who is mentioned in the article received several personal calls by interested parties a number of phone calls, and some letters asking for detailed information."

Almost every letter indicates that the maps of Canada—Canada and the roads issued by the Department of the Interior are passed from friend to friend and serve for the planning

of many outings in Canada. The same applies to canoe trips—reliable information is in great demand and when one party has successfully navigated a chain of Canada's rivers and lakes, and experienced the thrill of shooting rapids, many other parties follow.

A great deal of the correspondence relates to the location of camps or cabins for fishing and hunting. The Service has been called on for information on big game hunting from Labrador to northern British Columbia, and has been instrumental in directing enquirers as to where to outfit and obtain guides in every province. The correspondence indicates that the percentage is increasing annually of persons who want to linger in Canada and have a stake in the country in a lodge or cabin in which they can return each year. Assistance rendered them in choosing suitable locations is most gratefully acknowledged.

The Natural Resources Intelligence Service of the Department of the Interior, in addition to sending out maps and tourist literature sent to Americans planning to visit the Dominion, a leaflet on "How to Enter Canada" in which the Canadian Customs' regulations are briefly outlined. Motor vehicle and tourist outfit entry forms are also sent in order that these may be filled in by the tourist and thus expedite his passage across the border. All these helps are much appreciated, and the letters indicate a uniform courtesy on the part of Canadian Customs' officials and that the delay experienced at border points is at a minimum consistent with the observances of the regulations.

Plan New Mortgage Law

New Bill May Be Introduced In Next Session Of Alberta Legislature

New legislation along the lines of mortgage law procedure in Alberta will probably be introduced at the next session of the legislature. It will be in the form of a bill of sales and chattel mortgage act, a draft of which is now being considered by the government for possible adoption as part of the sessional docket.

The proposed legislation has been drafted by the eastern members of the commission on the uniformity of legislation, and has been approved by that body for general use in the various provinces, in accordance with the Alberta government's policy of giving effect as soon as possible to the uniform legislation suggested from that source. The draft is certain to get sympathetic consideration.

Big Increase In Use Of Gasoline

Returns In Alberta Show Increased Consumption For First Ten Months Of Year

Sales of gasoline in the province of Alberta for the first ten months of 1928 have exceeded by about 6,000,000 gallons the sales in any previous year. This increased consumption is attributed to the growing use of tractors, motor trucks, which are being more generally used by farmers for hauling grain and other products of the farm, and harvester combines in the province, as well as the increased number of automobiles licensed during the present year. Much of the gasoline used in Alberta is produced in the Turner Valley, which is about 45 miles south and west of Calgary.

Famous Canadian Guide

Peter Erasmus, guide to Dr. James Hector, geologist and geographer to the Palliser Expedition in 1858 and 1859, was born at Red River Settlement, in 1833, and is still living at Goodfellow Lake, Alberta, the sole survivor of the members of the Palliser expedition.

Among the people from whom the public hasn't heard recently are Mayor Thompson and the man who was going to the moon in a rocket.

"Where is your son?"
"I have sent him into the cellar to fetch a bottle."—Journal Amusant, Paris.

IN THE LAND OF EVANGELINE

Tourist travel through beautiful Nova Scotia is annually increasing by leaps and bounds. From apple-blossom time, when the Annapolis Valley is a veritable fairy-land into the late big game hunter leaves in the late fall, a steady stream of admiring visitors wander through the highways and by-ways from Yarmouth to Halifax. This new station of the Dominion Atlantic Railway at Grand Pre, built on the edge of the Grand Pre Memorial Park, is testimony to the appeal of Longfellow's immortal Evangeline. Thousands, each year, and from all parts of the Continent and the world come as pilgrims to the scene of the tragic Acadian Expulsion.

A New Standard of ---

RADIO QUALITY

Features

—Six Tubes including Power Radiotron. One Dial Control. Scientifically Shielded Circuit.

—Illuminated Indicator showing station wavelengths in metres and Kilocycles.

—Four Straight Line Frequency Condensers tuning all circuits—assuring vastly finer selectivity.

—Scientifically constructed Audio Transformers giving finer tonal realism.

—Built-in Temple Air-Chrome Speaker reproducing all audible frequencies with living vivid "presence."

—Output Choke, removing the D.C. from the Speaker and vastly improving the tone quality. Protects the speaker windings.

—Practically uniform amplification on all wavelengths.

—Cabinet by McLagan. Specially designed for use with genuine Marconi R.V.C. Radiotrons—Five U.X. 201A Tubes and One U.X. 171A Power Radiotron.

Reception

Whatever your conception of good Radio, by whatever rigid standard, you judge reception quality, we invite you to hear the new and better Marconi receivers. Know what this Marconi Radio standard really means. Know the new selectivity, achieved through the use of Four Condensers. Thrill to the Tone that is more than Tone, the wonderful realism of the Temple Air-Chrome Speaker unit, a built-in feature of these new advanced Radio instruments.

I will welcome the opportunity of proving the Marconi leadership in Tone, Selectivity, clear, true volume and real Radio value.

Vivid, living reception! Voices that are voices, music that is music. "Presence," Soul, Spirit—call it what you will—it's here, captured for you by Marconi skill, opening up a new wonderland of musical delight and listening pleasure.

Two Supreme Instruments ---

A New Battery Operated Console

A marvel of fine appearance and remarkable performance. Six Tubes. Built-in Temple Air-Chrome Speaker. Four condensers for real selectivity. The finest receiver in the Battery Operated Radio Field.

NEW TRIAL ORDERED
FOR VERNON BOOHER

Vernon Booher's conviction for the murder of his mother, brother, and two hired men at Mannville, July 9th, was quashed Tuesday morning by the appellate division of the supreme court of Alberta, and a new trial ordered; all members of the bench concurring in the decision.

The second trial of young Booher will in all probability take place during the January session of the supreme criminal court.

Errors on the part of the trial judge in permitting certain evidence, and mistakes by the crown prosecutor formed the base of the arguments for the new trial.

NORTHERN ALBERTA LINES
TO BE JOINTLY OPERATED
It is announced from Montreal that an agreement has been reached whereby the railway lines in Northern Alberta recently purchased from the Alberta Government, will be taken over and operated jointly by the Canadian Pacific and Canadian National Railways. General satisfaction is expressed by officials of the Alberta Government with this proposed arrangement and with the service which can thus be given to the territory served by the northern lines.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

The Wastebasket

"The stork has left you a cute little baby sister," said a neighbor lady to a youngster here. "I don't care nuthin' 'bout the baby," he replied, "but I'd like to see the stork."

Heard at the church social: "Will you have a third piece of pie, Mr." "Since you've taken the trouble to count, thank you, I will."

"Hello!" exclaimed a young newlywed as he stepped into the kitchen on his arrival home, "Making bread, or is it cake?" "I don't know," the young bride replied, "it isn't finished yet."

"My ancestors came over in the Mayflower," boasted a Tofield fellow to his Holden girl. "It was lucky they did," she replied, for the immigration laws are much stricter now."

"You haven't mended these?" said a local man to his wife last week exhibiting a pair of socks. "Did you buy that coat you promised me?" she asked. "No," he replied. "Well if you don't give a wrap I don't give a darn," she said.

"How long were you engaged to that Irma girl?" asked one Jarro fellow of another. "I don't know," he replied, "I forgot to look at my watch."

In The Streets

"You don't see so many intoxicated people on the street since prohibition," remarked the leader of a social reform organization to a man on the street last week. "No," the fellow replied, "You see, the stuff kills 'em before they get out of the door."

A Jarro girl, who sent a dollar in answering an advertisement on how to become more beautiful, received the following answer:

"Steam your face regularly every week, over your mother's wash tub. Wringing out clothes will make your arms plump, and hanging out the clothes will enlarge your bust measurement several inches, while the exercise of stooping and lifting the clothes will reduce your waist line. Hurrying from the stove to the table while helping your mother get the meals gives you good control of your lower limbs and the poise and dignity so many persons desire."

Heard at the ladies' social: "Is your husband tight, like mine?" "Is he?" Say, every time he takes a penny out of his pocket the Indian blinks at the light."

Here is a poem handed in by one of our young men:

"It is easy to be pleasant
For the girl who is not so weighty,
But the girl who is weighty,
Is the girl who can smile,
When the scales say 180."

It is beginning to look like Leap Year is going to pass up Canada's three celebrated bachelors, Bennett, Beatty and King.

Heard at the court house: Lawyer (to witness): "Now tell us what you know about this matter; not what you think." Witness: "Well, I ain't a lawyer. I can't talk without thinking."

"Darling, in the moonlight your teeth shine like pearls," said a Jarro fellow to his girl. "Oh, indeed," she replied, pouting, "as you've been out in the moonlight with Pearl, have you?"

First in the list of Canadian Farm papers is the Family Herald and Weekly Star, Montreal. It's only \$1 a year or three years for \$2. It is attracting world-wide attention.

Announcing -

The Outstanding Chevrolet of Chevrolet History - a Six in the price range of the four!

THE Chevrolet Motor Company of Canada, Limited, announces The Outstanding Chevrolet of Chevrolet History . . . a Six in the price range of the four!

Spectacular as Chevrolet's achievements have been in the past . . . notable as its engineering triumphs have proved themselves to be—this remarkable new car dwarfs every previous Chevrolet accomplishment. Not only does it introduce into the low-priced field an entirely new measure of performance, comfort, beauty and style—but it is sold at prices so low as to alter every previous conception of motor car value.

The new six-cylinder valve-in-head engine—developed from more than a hundred models designed especially for this sensational car—stands out as an engineering masterpiece. With a power increase of approximately 32% over the previous Chevrolet motor, with sensationally greater speed and faster acceleration—it offers a type of performance that is literally astounding . . . even to those who have been driving cars costing hundreds of dollars more.

The Roadster	\$665
The Phaeton	\$665
The Coach	\$770
The Coupe	\$760
The Sedan	\$870
The Sport Cabriolet	\$885
The Convertible Landau	\$925
Light Delivery Chassis	\$510
<i>Above prices at Factory, Oshawa Government Test Estate</i>	
1½ Ton Chassis	\$695
<i>At Factory, Walkerville Government Test Estate</i>	

Throughout the entire speed range, it performs with a smoothness and quietness of operation that have never before been approached in a low-priced automobile. At the slower speeds of city traffic it idles along with wonderful silence and ease. On boulevards and country roads it responds with an eagerness that is a constant delight. It takes the longest and steepest hills with an abundant reserve of power that is a source of pride to the driver.

And its economy of operation averages better than 20 miles to the gallon of gasoline!

In appearance, this Outstanding Chevrolet is so smart, so stylish and so distinctively appointed that it rivals the costliest custom creations. The new Fisher bodies are longer, lower and roomier with adjustable driver's seat in all closed models—and reveal the matchless artistry of Fisher designers. You are cordially invited to visit our showroom and secure complete and detailed information on this sensational new car which will be ready for delivery beginning January 1st.

ALBERTA PRODUCES

78.2 PER CENT. OF

OIL IN DOMINION

Nineteen producing wells in the Alberta oil fields gave a yield in 1927 of 318,741 barrels, according to information given out by the provincial publicity office and based on figures compiled by the dominion bureau of statistics. The value of this production was \$1,185,948, which was 78.2 per cent of the total production value for the whole dominion. The quality of the Alberta product is indicated by this high proportion.

Besides the producing wells, 39 others were in process of drilling during the year, including the since famous Okalta well, which now is giving promise of equalling the phenomenal Royalite No. 4 well. The majority of the wells are in the Turner valley, but the Wainwright, Ribstone and Skiff fields are making substantial contributions to the total output.

Alberta's petroleum production for last year was 2.3 times that of Ontario, its closest competitor, and in value it was more than four times as great. The rest of the dominion total of 476,591 barrels came from New Brunswick, where there was a production of 18,224 barrels. The production of this province was therefore 66.8 per cent of that of all Canada.

While the petroleum production of Canada is thus seen to be reaching into large figures, it is evident that there is still room for development, because petroleum imports into the dominion in 1927 amounted to \$52,878,717 in value, an increase over the preceding year of \$815,031.

BABY CHICKS — Canada's Bred-to-Lay White Leghorns, Barred Rocks, Reds, Wyandottes, White Rocks, Anconas, Minorcas, Orpingtons. From tested, trapezoidal, and inspected flocks. Big Discount for Orders received by January 1st. Write for Free Catalogue. Alex Taylor's Hatchery, 362 Furby St., Winnipeg, Man.

HAMBLEY ELECTRIC CHICKS

Windsors Quality Chicks

Now one hatchery co-operating to supply Pure-bred-to-lay chicks of known quality. All leading breeds at a saving in price. Your success depends on the quality flocks supplying your eggs. A Certificate of Breeding with each order. Know what you are buying.

Our Calgary hatchery will be open February 1st. 30,000 egg hatching capacity Calgary, Alberta. Buy chicks near home and raise them all. The best flocks in Alberta supply this branch. Expert service on chicks given. Free catalogue now ready, colored, illustrated, contains records, facts. Pages on feeding rations, culling, etc. Write today.

\$3.00 discount on each hundred chicks ordered before Jan. 1st.

VIKING

Dr. J. M. Hotson arrived here last week from Chicago where he has been taking a postgraduate course. Dr. Hotson will remain here for a few days before leaving for Vancouver where he is now situated.

Wm. Taylor Jr. received an injury to one of his eyes last week while repairing the windmill on the farm and had to be taken to Edmonton for treatment.

Mrs. J. C. Phillips left on Tuesday evening for Orland, California, where she will spend the winter months at the home of her brother there. Henry Gravett has returned from a visit to Provost, Hardisty and other C. P. R. towns.

AIR MAIL ROUTE OPENS DECEMBER 10

According to advice received by the local postmaster, the postoffice department will inaugurate special air mail flights commencing on December 10th 1928 and continuing daily until December 29th, 1928; between the following points: Winnipeg, Regina, Calgary, Saskatoon and Edmonton.

Only first class mail matter prepaid at the air mail rate of 5 cents for first ounce and 10 cents for each succeeding ounce or fraction thereof will be conveyed on these flights.

Registered mail properly prepaid will be accepted for conveyance. In order to commemorate the inauguration of the first official air mail service in the Prairie Provinces special cachets will be used. These special cachets will be used only on such covers as are sent to the different postmasters bearing Canadian postage at the air mail rate. All covers so prepaid and bearing an indication on cover as follows: Via Air Mail, Winnipeg-Edmonton; Calgary-Regina Etc., whichever the case may be will be date stamped by the receiving postmaster and backstamped at post-office at end of flight in addition to bearing the special commemorative cachet.

All covers conveyed on these flights addressed to points beyond the terminus will be placed in the ordinary mail at that point and will go forward to the addressee in the ordinary way.

See your local postmaster for further information if you wish to send some mail via the air route.

The Family Herald and Weekly Star of Montreal is not only a money maker but a money saver to the farmers of Canada, while the farmers' family circle, in the accompanying magazine, gets what is admitted to be the best of all.

WORLD HAPPENINGS BRIEFLY TOLD

Plans are being made for construction next spring of an airport at Chicoutimi, Que., for land and sea planes.

The financial collapse of Russia is imminent, according to a ministerial statement in the British House of Commons.

A tri-city air service between Seattle, Victoria and Vancouver and a service between Seattle and Alaska will be started next April by the Union Air Lines.

By the end of this year it is expected that the British Columbia government will have prepared for Lord Lovat a settler scheme, Premier Tolinie says.

The Graf Zeppelin will make no second trip to America this year. The Zeppelin works in announcing this, said that the necessary supply of gas was not available.

Major Yochio Inouye, counselor at the Japanese embassy at Buenos Aires, who was drowned in the sinking of the Vestris, has been posthumously promoted to lieutenant-colonel.

The Canadian Memorial Chapel, a sanctuary in memory and in honor of the seventy thousand Canadians killed in the war, and erected in Vancouver through the efforts of Lieut. Colonel the Rev. G. O. Falls, B.D., C.B.E., has been opened there.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the bronchial passage of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Consolidated Wheat Pools

Have Marketed Huge Amount Of Grain During First Five Year Record

During the first five-year period the consolidated pools of the three western provinces have marketed approximately 750,000,000 bushels of grain, coarse grains included, with a total turnover in money exceeding \$1,100,000,000. During that time the three pools have accumulated through elevator deductions and commercial reserves, which belong to the grower, over \$20,000,000.

Dairy Industry Flourishing

Outlook Never Appeared Brighter Than At the Present Time

"The outlook of the dairy industry in Canada never appeared brighter," says Dr. J. A. Ridd, the commissioner of the dairy and cold storage branch of the Department of Agriculture. "The value of our dairy production this year will be around \$265,000,000. We have approximately 3,800,000 milch cows in Canada. They are in every province although Ontario and Quebec have the most. While the cheese production is not a record on this year, it is very high. About 100,000 boxes more will be exported in 1928 than in 1927. Canada produced the most milk in its history this year."

WHEN YOUR BABY CATCHES A COLD

In spite of all precautions little ones will take colds—especially during the changeable days of our Fall season. When the first symptoms appear—sneezing, redness of the eyes, running nose—Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent more serious complications.

Mothers who keep a box of Baby's Own Tablets in the home always feel safe. In fact they are like having a doctor in the house. They are gentle but thorough laxative that sweeten the stomach and regulate the bowels, thus driving out constipation and indigestion and relieving the baby of the many childhood ailments which are the direct result of a clogged condition of the bowels or sour stomach. They are absolutely safe—being guaranteed to contain no drug at all harmful to even the youngest babe. They cannot possibly do harm—they always do good.

Baby's Own Tablets are sold by all medicine dealers or will be sent by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Typically Parisian
 A smart model of printed sheer velvet with ecru lace used for neckline and cuffs. A clever plait arrangement in three-piece wrap-around skirt, forming a cascading drape, contributes to the animation of line, while jabot revers falling from shoulders, add charmingly to the effect. Silk crepe, plain velvet, velvet, crepe satin, canton-fabric crepe and sheer woolen are chic for Style No. 156. Pattern can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. The 36-inch size requires 3 3/4 yards of 40-inch material with 4 1/2 yards of 27-inch material for separate vest. Price 25 cents, in stamps or coin (coin preferred). Wrap coin carefully.

DISTINGUISHED VISITORS TO CANADA

Sir Austen Chamberlain, British secretary of foreign affairs, who recently made a tour of Canada with members of his family. Sir Austen and Lady Chamberlain were decorated together by his majesty the king for their services in the completion of the Locarno peace pact. Recently Sir Austen's health has been the cause of considerable anxiety and his journey apparently had its effect as the foreign secretary reported that he felt "quite well." These two pictures were taken in Toronto. (1) Miss Diane Chamberlain; (2) Sir Austen.

Windolite

Improved Glass Substitute Is Now Available In Canada

"WINDOLITE"—the English unbreakable improved glass substitute, which is now so popular in the British Isles, is being marketed in Canada by John A. Chantler & Co., Limited, 49 Wellington St. West, Toronto, Ontario.

Severest tests carried out in England, showed that "Windolite" is remarkable, not only for its unbreakable qualities and ultraviolet ray penetration, but it was found that "Windolite" will stand up under usage that would wreck many other glass substitutes.

The fact that "Windolite" is translucent and allows 100 per cent. sunlight with the life-giving ultra-violet ray to enter, opens a wide scope of practical use. The importance of which will at once suggest themselves. Windolite consists of transparent solution, reinforced with fine special galvanized wire mesh, which results in a substance that is completely waterproof, airtight, and dust-proof. It is flexible and unbreakable, and may be readily cut with the ordinary pair of scissors, to any required size. It therefore, forms a practical substitute for glass, and where transmission of ultra-violet radiation is required to promote health and growth, it is ideal. These beneficial rays are vital to young chicks, laying hens, dairy herds, live stock, and also are economical for sunrooms, nurseries, verandas, hospitals, schools, and for hot beds and plant coverings. It is light but strong.

Quoting from some British authorities, they have the following to say of "Windolite": "A well-known poultry breeder, member of S.P.B.A., N.U.P.S., and National Farmers' Union, whose farm is a Certified Breeding Station, and the Ministry of Agriculture and Fisheries, says of Windolite: 'I have proved to my satisfaction the benefits obtained from the use of Windolite in my brooder house. I replaced the ordinary glass on one side only with your substitute, and although it has been in use only a matter of a week or ten days, the results are very remarkable. The chicks on this side are doing very much better than those of the other. I have kept both sides indoors for the purpose of noting the results.'"

"British Medical Journal" April, 1925:—"Windolite has been used by poultry keepers and market gardeners as a substitute for glass, but it is now suggested that as it allows ultra-violet rays to pass much more freely than ordinary glass, it may be of use in medicine. It has been examined for us and it is found that as claimed, it lets the ultra-violet rays through freely."

Bishop's Castle, Shropshire:—"I shall be pleased if you will send me as quickly as possible—I have had a frame in use for nearly three years, and it has proved very satisfactory." (Signed) C.W.D.

This effective glass substitute will no doubt become very popular with stock breeders, dairy men and poultry breeders. It should also be a boon to mining camps and prospectors who cannot pack glass successfully over rough trails without breakage. It will stand up under rough treatment and has the added advantage of being flexible.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throats or chest and any similar ailment, use Dr. Thomas' Electric Oil. Its healing power is well known to every section of the community. A bottle of Dr. Thomas' Electric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Volcanic Dust

Volcanic dust found in Saskatchewan and British Columbia is used for purposes similar to ground pumice, particularly in the manufacture of cleansers and scouring powders and in some instances as a substitute for fuller's earth in the refining of hard oils and fats.

"This is Mrs. Warrior's third husband, isn't it?"
 "Yes. She's two down and one to go."

Press Best Medium For Reaching Public

Sir Charles Higham Extols Benefits Of Newspaper Advertising

Sir Charles Frederick Higham, author and publicist, speaking on "Scientific Distribution," said there was no advertising medium so useful as the press, and none that was responded to with such speed and profit. Newspaper advertising paid better today than it ever did. Most of the goods now consumed by the public were sold under a branded name, and the most economical method of distributing these was by press advertising, properly done. The dealer would always stock an article which was nationally advertised in the daily press, because he was convinced, first, that the article must be good or it would not be advertised at all, and secondly, that the public would respond to it because they knew that they were getting good value for their money.

The Government had found newspaper advertising extremely valuable in increasing the sales of British goods through the Empire Marketing Board, Sir Charles said.

Milk For Dairy Factories

The approximate amount of milk required to supply dairy factories in Canada during 1926, based on the quantity of milk delivered and the equivalent in milk of the butter fat content of the cream delivered, was 7,118,940,782 pounds.

Mail handled one day in Chicago, totalled 6,500,000 pieces.

Don't eat fast, if you are thin. Don't eat. Fast—if you are plump.

Originated "Great Silence"

Australian Journalist Who Suggested Tribute To War Victims Died In Poverty

As the nations of the world marked the tenth anniversary of the armistice, the Melbourne Herald printed a pathetic story of the origin of "the great silence," which was conceived by an Australian journalist, Edward George Honey, who died in London in 1922.

Mr. Honey, who served with a Middlesex regiment, the story says, in a flash of genius suggested the "great silence" in 1919. At first he pleaded with officials and the public for five minutes of national remembrance. At an official rehearsal which he attended it was decided that five minutes was too long, and a two-minute period was adopted.

The newspaper says that two years after this universal tribute to the war dead was adopted by the nations of the world, Mr. Honey fell a victim of tuberculosis, died in poverty in London, and was buried in a tiny cemetery in Northwood, Middlesex, with only a bare mound to mark his grave.

Protects Against Air Attacks

Germany Has New Gas Which Makes Town Invisible

While flying over the town of Bobblingham, near Stuttgart, Germany, an aviator was surprised to see the houses and factories disappear before his eyes. It was during a test being made by German air ministry officials and a party of engineers, of the new gas invented by Dr. Reddemann, the German gas expert, which enables a city to protect itself against air attacks by rendering it invisible. Ten vessels, containing a secret chemical solution, had been placed about the buildings, and by pressing an electric button Dr. Reddemann ignited the chemical, and clouds of smoke 200 feet high covered an area of 500 square yards. At Cuxhaven a large plant is being constructed to store the chemical to be used in veiling the city in case of war.

New Source Of Electricity

River Mud Is Attracting Attention Of Scientists In Europe

Scientists of Europe are taking an interest in reports that mud is to be the source of electrical supply at a power station being erected at Karpis, Germany. The mud will be extracted from the River Ems. It is said to contain a combustible material that, by a new method will be extracted, dried and then used for fuel for the works. The heat value is declared to be equal to that of lignite. Investigators declare that the new process is of international importance because there are many rivers in coal districts throughout the world, the mud of which could be treated in the same manner.

Canada ranks third in importance, as a source of metals of the platinum group, after Russia and Colombia.

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot put away. And it's always ready for the crueler pains of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Branch Line Construction

More Than 330 Miles Of New Lines and 71 New Stations Built By C.P.R. In Past Season

The building of more than 330 miles of new branch lines, with 71 new stations and shipping points sums up in brief the construction programme of the Canadian Pacific Railway in Western Canada during the past summer, according to D. C. Coleman, Vice-President, Western Lines. By this means hundreds of farmers had been brought much closer to transportation facilities, and thousands of acres of rich agricultural land had been made much more attractive from the settlers viewpoint. The construction programme has gone forward rapidly, and as a consequence a considerable amount of this year's crop is being marketed over the new tracings. Mr. Coleman pointed out. A feature of the branch line construction was found in the rapidity with which settlement followed the laying of the steel. Country elevators to the number of approximately 300 were already built or in the course of construction, while in many cases towns were beginning to spring up around the newly erected station buildings.

To avoid the run-down feeling approach crossings carefully.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows, stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 130 to 140 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

CHAPTER VII.—Continued.

He was known under several sobriquets: "Trapper" John, "Coffee" John, and "Mahogany" John. "Coffee" John for the excellence of his brew of that beverage, and of which he drank enormous quantities. His call to meals: "Come and throw your feet under the mahogany," supplied the reason for the cognomen of "Mahogany" John.

With the assistance of their host the unsaddled tired horses and turned them in the pasture, where they rolled luxuriously on their backs for a moment, and then started feeding hungrily on the rich clover.

A wind shook the tree-tops and turned the surface of the lake dark with ripples. High in air, streaming dark clouds crossed swiftly by.

"Got her just in time," said the old trapper, as he looked up at the sky. "It's a goin' to rain. Come inside."

John had served as cook in a cowboy camp in Texas. He never overlooked an opportunity to make ostentatious display of his skill in the culinary art.

"Just see my bread this mornin'," he explained, "so I'll hev'er make a bannock."

Taking a tin pan from the shelf, he threw it the full length of the room to the table. He tossed the cooking utensils about like a practised juggler. Soon the bannock swelled to the rim of the frying-pan, the edges glowing brown and crisp.

He lifted the heavy dish from the stove, and with a dexterous twist of his wrist threw the bannock to the ceiling and caught it nearly in the centre of the pan as it came down. He dipped a half dozen trout in the yolk of eggs, rolled them in flour, then tossed them with apparent carelessness, but with deadly aim, one at a time, to the sizzling pan. From a shelf he took two glass jars and turned their contents into an earthenware dish on the stove. Immediately the room was filled with an aroma that caused the newcomers to sniff hungrily.

"Mr. Hillier," began Andy, "what's that?"

"Mr. Hillier, Hell! My name's John," exploded the trapper.

"I was goin' to ask you what kind of meat that is that smells so good," grinned Andy.

"Muskkrat,"

"Muskkrat," repeated their host, turning to the astonished Australian.

"Did you ever eat any?"

"No," returned Andy weakly, "I don't care much for meat anyway."

"They're darn good eatin'," affirmed the trapper. "Reason folks won't try 'em is because they think that they are a rat. Their right name is muskrat, and they live on vegetable food only. Did any of you fellows ever see 'Diamond Back Terrapin' on a bill-of-fare in restaurants?"

"I have, many times," answered Donald.

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a Grateful Woman

Vanessa, Ont.—"It think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of these women and have certainly received great benefit from it. I urge my friends to take the same help I did."—Mrs. MILTON MOULLEN, Vanessa, Ontario.

W. N. U. 1761

throat his leathery cheeks folded and unfolded like the pleats of an accordion.

"Wow!" he yelled, "she's sure got a kick."

The humorous toast and the trapper's facial contortions sent Andy into paroxysms of laughter.

"Strike me blind!" he gasped, as he held his sides. "I never—!" His eyes rested again on the trapper's convulsed features. Speech failed him and he sank writhing to a chair.

When finally they climbed the ladder to their bunks the rain had ceased and a brilliant moon flooded the valley with a white light.

Donald awakened as the first grey streaks of dawn brightened the dusky windows of the loft. The air suddenly filled with the sweet song of birds. Wild-fowl quacked and splashed in the waters of the lake. The aroma of coffee and frying bacon and the pungent odour of wood smoke was wafted strongly from below.

Suddenly the trapper's shaggy head protruded through the opening at the top of the ladder. "Get out o' the hay, an' let the sun shine on ye!" he boomed.

"Now, let's get busy," said Gillis. When breakfast was over, "The first thing to do is to find a good spot to pitch our tent."

"You'll find a deserted cabin at 'other end o' the lake that'll be a whole lot more comfortable nor a tent," informed the trapper.

The cabin of cedar logs proved to be in good repair and the location excellent.

"A couple of days' work," observed Gillis, "an' I can fix her up so's we'll be as snug as a bug in a rug."

John had spent the forenoon in baking. Cakes, pies, doughnuts and cookies were placed at regular intervals on the shelves in platters and tins tipped at an angle to make the display more effective. It was an exhibit of pastry that any housewife might envy. The unstinted praise of his guests was like music to the trapper's ears.

For dessert they had a savoury mince-pie, steaming hot from the oven. Andy waxed most eloquent in his praise of this culinary delight.

"Have another piece o' tinner," insisted John, as he transferred a big slice to his plate.

"Like it, do ye?" asked John.

"U-m-m," mumbled Andy as he devoured the last crumb and settled back with a sigh of content.

John's wrinkled old face spread into a wide grin. From his lips came a cackling laugh.

"What's the joke?" queried Andy.

"I thought I'd get that muskrat into ye somehow," chuckled the trapper.

"Well, it's not so darned bad, after all," philosophized Andy.

On the third day after their arrival they moved to the cabin at the head of the lake. There followed days of arduous toil, days spent in "blazing" lines through almost impassable swales, up steep hillsides and through canyons. Days of strenuous exercise in the stimulating air, when the bright sunshine tanned their faces to a deep brown, brought the glow of perfect health to their eyes and gave to their muscles the resiliency and strength of steel springs.

(To Be Continued.)

Six Thousand Years Old

Fish Found In Sweden Belongs To Later Ice Age

An interesting discovery has just been made in the North of Sweden where some workmen when digging at a distance of 24 feet from the surface came across a curious object embedded in the river mud. It was found to be the remains of a fish belonging to the later Ice Age, and according to geologists, is about 6,000 years old.

Would Stand Repeating

An old maid went to confession and told the priest that she had been ardently kissed.

"When did that happen?" said the priest gently.

"Twenty years ago," the old maid told him.

"Have you ever confessed this before?"

"Many times, father," sighed the penitent, "but I just love to talk about it!"

Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published by The Saskatchewan Dental Society

TOOTH BUILDING FOODS

You decide to build, so you approach an architect who draws up plans and specifications; when the contractor walks in and supplies the materials called for, and your house goes up according to plan and without delay.

Now your tooth. Here's a piece of masonry: Nature the architect, you the contractor.

The element of chief importance in the development of teeth and bones is the calcium content, such as is supplied in the line of milk, eggs, cereals, in fresh fruits, vegetables, such as carrots, asparagus, cabbage, brussels sprouts and many others.

First the foundation must be well and truly laid: so the diet of the growing jaws the greatest number of teeth that they will ever contain.

Now, as perhaps you may be surprised to find the time and effort since before birth and their development continues throughout the early periods of childhood, until they erupt almost fully formed. So the diet of the child up to the fifteenth and sixteenth years should receive special care.

Also (it is also important to note), in the period from the third to the sixth year, there is present in the growing jaws the greatest number of teeth that they will ever contain.

There are in eruption at this time the Royal Palaces at Kyoto are small, the developing germs of twenty-eight permanent teeth, making a total of forty-eight fully or partially formed. Hence at this age and onward, the demand for lime phosphorus and other inorganic salts, apart from the needs for the materials for the developing of bones, is unusually high.

Then again: Calcium is necessary in the clotting of blood and in the digestion of fats, so that if there is an inadequate supply of this element in the diet, the blood and digestive tract are unable to supply the materials for the developing of bones, and these requirements for vital purposes, the teeth are structurally weakened and are left more prone to disease.

When your structure fails—and whose fault?

When Work Was Work

Story Of the Days Before the Advent Of the Eight Hour System

That old story about the city man who yearned to surprise the farmer with whom he had engaged to work through a harvest might be applied with force to those pioneer days in Canada, when a good farmhand was judged by the amount of sweat he could shed for \$1.00 a day.

This city chap got his alarm clock for three and sallied forth shortly after that hour in black darkness, sanguine that he would delight his employer. On turning a corner of the barn he met the farmer, who had a brimming pail of milk in either hand and held the bail of a lantern in his teeth. Placing the pails upon the ground and removing the lantern, the farmer, with a withering glance, remarked, "Where have you been this hull day?"

But that was before the eight-hour day became general and some farmers were satisfied with their lot, while not a few, because of the ideal occupation for the man who loved nature in all her aspects—Free Press.

Letters Raced Around World

Winner Made Entire Trip In Seventy-Eight Days

People are growing so accustomed now to flyers going east and west, men and women crossing continents and oceans, that nothing which touches on flying can surprise one very greatly. But it is interesting to know that lately two letters have been racing round the world by established air, water and rail routes.

The letter winner, the first letter to go all the way round the world in the open mail, finished at Seattle, United States, in 75 days, 1 hour, and 30 minutes.

So much of a charity fund goes to pay overhead expenses why not give the office jobs to those who need charity

Teacher—What is the highest form of animal life?
Little Peter (quickly)—The giraffe!

Sacred White Elephant

Fine Specimen Is Reported To Have Been Captured In Siam

A sacred white elephant—which in Siam is of great religion and political significance has been found in Changav Khudhand, according to advices from the royal family from that province.

The holder of a special elephant catching permit in Changav Khudhand informed officials here that he had captured the elephant in one of the regular "round ups" and that it had been inspected by authorities there and declared a true white elephant. The ministry of interior immediately dispatched an expert to the district to conduct a formal investigation and the country awaits his report with great excitement.

The local elephant catcher was driven into a trap when he discovered the animal's heart. It was described as a five foot tall male with 15 inch tusks. It is a particularly fine specimen and—if it proves to be a real white elephant—will be installed with elaborate ceremonies at the capital.

Characteristic Of Japan

Everything About Country and People Is Small But Not Weak

Perhaps the first impression on landing in Japan is the littleness of everything. The little flimsy houses, the little flimsy shops, the small men, the toy-like women, the tiny children, as numerous and like unto each other as the sands on the shore—these are everywhere. But although very small of stature the Japanese men are often very powerfully built, and many of them suggest great strength.

Littleness—which is associated with the most delicate detail and elaborate finish—is the mark also of the modern Japanese art. In the curious shops whatever was massive or largely simple was Chinese. Even the Royal Palaces at Kyoto are small, the rooms, exquisite as they are, with perfect joinery and ancient paintings, being seldom more than a few feet square, with very low ceilings.

Remember that you are an actor of just such a part as is assigned you by the poet of the play; of a short part, if the part be long; of a long part, if the part be long. Should he wish you to act the part of a beggar, take care to act it naturally and nobly; and the same if it be the part of a lame man or a ruler. For this is in your power, to act well the part assigned to you; but to choose that part is the function of another.

—Epictetus.

Remember that you are an actor of just such a part as is assigned you by the poet of the play; of a short part, if the part be long; of a long part, if the part be long. "Marlatt's Treatment"
At this season of the year when intestinal "flu" is prevalent and in this age when so many are worried by high blood pressure and "nerves," too much care cannot be taken to keep the system entirely free from poisons and impurities. Marlatt's has for many years been found most valuable in toning up the liver, in keeping the intestines functioning normally and in preventing bile stagnation. Try this highly recommended treatment now.

Little Helps For This Week

"According to the eternal purpose."—Ephesians iii. 11.

One small life in God's great plan. How futile it seems as the ages roll. Do what it may, or strive how it can, To alter the sweep of the infinite whole.

A single stitch in an endless web. A drop in the ocean's flow and ebb. But the pattern is rent where the stitch is lost.

Or marred where the tangled threads have crossed. And each life that fails of its true intent. Mars the perfect plan that its Master meant.

—Susan Coolidge.
